Apollo Homeward-Bound

And Now They're Talking Of Tourist Trips to Moon

By VICTOR K. McELHENY

Staff Writer

SPACE CENTER, Houston — Moments after the Apollo 11 astronauts blasted out of lunar orbit at 12:54 a.m. EDT this morning, leaders of the U.S. space program talked of journeys into space by everyday people within 10 years.

The accomplishment of man's first landing on the Moon Sunday, they said, had proven out the technique for landing men on a planet like Mars.

The officials also looked forward to the day when man would find a way to harness the reaction which takes place inside the Sun to produce the rocket power needed for journeys to other solar systems.

Speaking with the confidence brought by the success - so far - of Apollo 11, they said that the U.S. space program was likely to attract the needed money and talent even without setting some goal like a manned flight to the surface of Mars by 1986 on the model of President Kennedy's 1961 challenge of a manned lunar flight by 1970.

Astronauts Neil Armstrong, Michael Collins and Edwin Aldrin left lunar orbit some seven hours 20 minutes after Armstrong and Aldrin had completed a flawless ascent from the Moon's surface at 5:35 p.m. by docking the upper stage of the Apollo lunar mod-ule with the command module cabin occupied by Col-

The ascent began at 1:45 p.m. EDT when the upper part of the lunar module lifted from the lower with the firing of the LM's ascent engine, thus bring-

ing the 21.5-hour occupation of Tranquility Base to an

A seven minute "burn" of the ascent engine carried the craft into lunar orbit some 190 miles west of the landing site, at an altitude around 10 miles. Additional maneuvers, using only small steering rockets, brought the craft to a rendezvous with Collins behind the Moon.

The three Apollo 11 astronauts completed the transfer of equipment and lunar sample cases from the lunar craft into the command module cabin cases from the lunar craft into the command module cabin much earlier than expected, and so "Eagle" was jettisoned in lunar orbit at 7:42 p.m. instead of at 9:25 as expected.

The crew of Apollo 11 is expected to slam into the atmosphere of Earth at nearly 25,000 miles an hour shortly after 12:30 p.m. Thursday and to flutter to a Pacific Ocean landing spot southwest of Johnston Island at 12:51 p.m.

Apollo Aloha On Nixon List

United Press International

WASHINGTON - President Nixon, exuberant about the success of the Apollo 11 Moon mission, planned a crowded day before starting out on a sevennation tour which will take him around the world and back by Aug. 3.

The chief executive is scheduled to start his trip late tonight after attending the major league All-Star Baseball Game here. He will spend the night in San Francisco, then continue to Johnston Island, south of Hawaii. From this small island he will proceed by helicopter to the USS Hornet and watch the recovery Thursday of the triumphant Apollo 11 astronauts.

tape parades for the Apollo will be his guests on Aug. 11 astronauts in New York 13. and Chicago and a formal dinner across the continent

Nixon also ordered ticker in Los Angeles where they

House Overrides Pay Veto

(BULLETIN)

With little debate the House today overrode Governor Sargent's veto of the state workers' pay raise bill by 195 to 32 on a rollcall vote. The House action drew an immediate response of applause from a gallery jammed with state emBy MIKE BEATRICE Staff Writer

The Legislature today prepared to do for the state's 55,000 employees what it could not do for itself-override Gov. Sargent's veto of House-Senate approved state pay

Sargent said "no" to a workers' pay hike of \$20

per week or 12 percent (whichever is greater) last week calling instead for a flat 14 percent increase for all job classifications. While the Legislature called for a retroactive date of Jan. 1, Sargent recommended May 1.

Earlier this year the governor took similar action on proposed pay raise for

State O.K.'s Imbalance Plan

racial imbalance plan, which plan. calls for nine new school construction projects that would take 1400 pupils out of imbalanced schools, was

The board approved the plan with two members dissenting after a debate in which several members expressed reservations about endorsing the plan without assurances that transportation would be provided for students going to racially balanced schools.
